As enterprises migrate their application footprints to the cloud to leverage the scalability and subscription based licensing, there is growing concern about the cost, business disruption and risk during the migration. There is also concern about security, time to transition, ease of adoption, and data conversion. Moving to the cloud enables on going automated compliance (automatic patching) and eliminates the need to deal with server hardware and other infrastructure related issues. Making the transition from EBS R12 to Oracle Cloud with minimal effort, cost and risk are critical to quick benefit realization from cloud migration.

Automated migration from Oracle EBS to Oracle Cloud SAAS

SPL's Oracle Cloud Migration provides a powerful solution to address all the cloud migration concerns. Currently most configuration tasks are manually performed multiple times. This becomes even more challenging when migrating from dissimilar system - EBS R12 to Cloud ERP. SPL Oracle Cloud Migration allows current EBS users to extract their configuration and master data in a seamless fashion for review and import into the Oracle Cloud platform. Time to transition is reduced drastically as configurations can be copied from EBS R12 to Test, Test to QA and QA to Prod environments automatically.

Solution

SPL Oracle Cloud Migration simplifies the transition to Cloud ERP. OCM provides a sample set of generic configurations for companies to start and then tweak as per their requirements as they progress through testing. We smoothen the transition and bring our clients up to speed with additional artifacts, suggested configuration templates, baseline test scripts, design documents, user training and implementation planning.

- Extract configuration and master data from EBS systems (11i onwards, starting with R12 and then extend to 11i)
- Review in a shared framework model that allows for validating and making changes if needed.
- Create uploads for Cloud ERP (even R12 migrations can be managed)
- Reports to validate the migrations with check points and accepted business practice references/suggestions.
- Pre-formatted templates to envision configuration and master data within the Oracle ERP (EBS or Cloud) framework.
- Pre built test automation framework and test cases using Xenon.
- A pre-validated and functional environment for the user review in a fraction of the time.

Our Customers

Why Choose SPL for Oracle Cloud Migrations?

SPL has strong credentials, certifications and success stories as a trusted ERP partner for enterprises across the Globe.

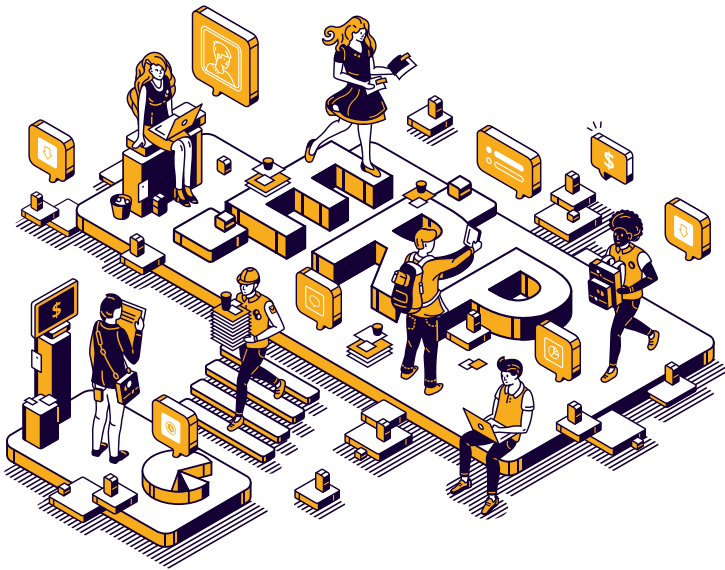

The SPL Advantage

14+
Years

45+
Projects Delivered

30+
Certifications

110+
Associates

We are your Trusted

ORACLE

Partner

SPL's Oracle Services Overview

- Consulting services / advisory
- Implementations (EBS & cloud)
- Upgrade services
- Data Analytics
- Oracle iaas / paas services
- Managed Services
- Infrastructure and Databases
- APEX & Custom Application Development

Join in

Partner with SPL

Let us guide your path amidst the clouds and help you build the future enterprise.

Be an expert

Become a master in the interplay of domains and industries. Drive higher benchmarks of success.

A leader

Knowledge powerhouse we all hold together-clients, partners and SPL experts.
