Phone: +1 817.410.7393

Oracle Project Portfolio Management Cloud is a complete, comprehensive, and integrated suite of applications widely used in project-driven organizations and companies. It is built on open standards using a service-oriented architecture and common platform, which can be adopted as part of the Oracle cloud suite or deployed with existing solutions. Oracle Project Portfolio Management (PPM) Cloud improves how project-driven organizations and professional services teams work. Providing a single source of truth and a centralized repository to store and access project-related data and information, which project managers and finance groups use. The suite gives improved visibility to project costs, project revenues, work breakdown structures, resource utilization, and overall project profitability.

Oracle PPM Cloud Products

Oracle PPM Cloud is a complete PPM solution, and these products can be implemented separately as a standalone module or implemented together to have a complete project management solution.

Oracle PPM Cloud includes the following products:

- Oracle Project Financials Cloud
- Oracle Project Resource Management Cloud
- Oracle Project Contract Billing Cloud
- Oracle Project Management Cloud
- Oracle Grants Management Cloud
- Oracle Task Management Cloud

There are two offerings under the Oracle PPM Cloud suite and each of the offerings include the following applications listed below:

Project Financial Management

- Project Control
- Project Costing
- Project Billing
- Project Contracts
- Project Performance Reporting

Project Execution Management

- Project Management
- Task Management
- Resources Management

The modules in Fusion PPM are described below:

As described above, eight key modules of project financials and project execution management offer a complete cloud solution.

- **Project Control** – used to manage project financial planning, budgeting, progressing, and forecasting
- **Project Costing** – used to capture and account for project costs and commitments
- **Project Billing** – ensure contract compliance when billing and recognizing revenue
- **Project Contracts** – common framework for contract administration, management, and control
- **Project Performance Reporting** – multi-dimensional reporting for project/financial analysis and action
- **Project Management** – collaborative project planning & scheduling for project teams
- **Task Management** – task info, details, collaboration, and social project management
- **Resource Management** – analyze and optimize resource allocation and utilization

Key Features of Oracle PPM Cloud

- Centralized location and a single source of truth for project data
- Versatile and template-driven project definition
- Robust expenditure control, collection, and adjustment functionality integrated with other Oracle applications
- Rule-based general ledger account derivation functionality
- Maintain cost and revenue budget separately and in multiple currencies
- Fully integrated with other Oracle modules such as financials, procurement, enterprise contracts, and HCM
- Collaborative project planning and scheduling
- Integrated with workflows for setting up approvals per business needs
- Ability to implement one module, a product family, or an entire suite per your business needs
- Offers mobile solution for project managers and team members
- Embedded transactional intelligence allows faster reporting and decision-making
- Allows integration with Microsoft Projects for effective project management
- Trends and historical analysis for project key performance indicators
- Provides an Excel template to load data for projects, tasks, costs, budgets, forecasts, and billing events

Benefits of using Oracle PPM Cloud

- Make better and informed decisions by accessing real-time data
- Determines true cost of executing projects
- Allows monitoring of project performance
- Capture CIP costs for capital assets
- Achieve more productivity and profitability through intuitive user interfaces and role-based dashboards
- Lowers the administrative burden of project planning and management through guided processes
- Optimize the allocation and utilization of resources by identifying best-fit resources if using Resource Management
- Allows project team members and project managers collaborate to plan, execute, and promptly deliver tasks
- Offers mobile app features that allows project managers to manage tasks and access the project status from anywhere, anytime

The SPL Advantage

14+
Years

45+
Projects Delivered

30+
Certifications

110+
Associates

We are your Trusted

ORACLE

Partner

SPL's Oracle Services Overview

- Consulting services / advisory
- Implementations (EBS & cloud)
- Upgrade services
- Data Analytics
- Oracle iaas / paas services
- Managed Services
- Infrastructure and Databases
- APEX & Custom Application Development

Join in

Partner with SPL

Let us guide your path amidst the clouds and help you build the future enterprise.

Be an expert

Become a master in the interplay of domains and industries. Drive higher benchmarks of success.

A leader

Knowledge powerhouse we all hold together- clients, partners and SPL experts.
